

VitaCholine – USP Dietary Ingredient Verified

United States Pharmacopeia (USP)

USP's Dietary Ingredient Verification Program helps manufacturers demonstrate the quality of their dietary ingredients. The program can differentiate ingredients and help a company maintain its sales edge in a competitive global market. The program serves as a means of supplier qualification, potentially reducing audits from customers, and reduces the risk of inconsistent and substandard ingredient quality.

Offered to manufacturers worldwide, USP Dietary Ingredient Verification Services include GMP facility auditing, ingredient quality control and manufacturing documentation review, and ingredient testing. Participation is voluntary and ingredients that meet USP's stringent requirements are awarded the distinctive USP Verified Mark, making it easy for manufacturers of finished products to spot quality they can trust.

VitaCholine

Balchem's VitaCholine® is a leading brand of choline, an essential nutrient for all human life stages. We have worked closely with the USP to obtain Verified Dietary Ingredient status for our choline bitartrate and choline chloride salts manufactured and sold in the United States.

Here are the VitaCholine products that have USP Verified Dietary Ingredient status:

- Choline L(+) Bitartrate 40 Mesh Conditioned, F6472120
- Choline L(+) Bitartrate Regular, F6492120
- Choline L(+) Bitartrate 20 Mesh Conditioned, F6502120
- Choline L(+) Bitartrate Conditioned Regular, F6512120
- Choline Chloride, F6522120
- Choline Chloride 1% Conditioned, F6524120

Learn more about the multiple health benefits of choline and discover how VitaCholine can help differentiate your products with consumers:
